REPRESENTATIVE PROJECTS

Vice-President of Operations

Neil is responsible for managing a staff of environmental technicians and environmental specialists in a variety of environmental, health, and safety projects. Tasks include scheduling, client relations, report preparation, technical direction, employee management, and logistics.

Senior Project Manager, Indoor Environmental Quality Assessments

As Project manager for Indoor Environmental Quality Assessments, Neil has been responsible for performing site investigations, collecting microorganism samples, drafting remediation recommendations and report preparation. Assessments included pre and post remediation testing, on-site management and cause of loss investigations. Projects included residential and commercial facilities. Clients included homeowners, remediation contractors, insurance companies, attorneys, banks, and corporate property owners.

On-Site Health and Safety Consultant

Neil has worked with various facilities including Boeing and Merichem as an on-site safety and health consultant. Duties included training, generating safety programs, maintaining safety equipment and record keeping.

Project Manager, Groundwater Remediation Systems

As a local project manager, Neil has been responsible for maintenance and system sampling for a large-scale groundwater remediation project at a Huntsville, Alabama, electronics manufacturer.

Other Related Experience

- On-site experience on numerous Industrial Hygiene testing projects
- Project Management of Emission Source Testing projects
- Project Management of Investigative Environmental Testing projects, including Chemical Trespass Cases and Accidental Death Investigations
- Project Management and On-site responder for hazardous material spill response and remediation projects
- Project Management and On-site Safety Supervisor for Environmental Remediation Construction Projects
